INTRODUCTION

The present volume constitutes the 1927 edition of the Hill Directory Co.'s Greensboro City Directory. The work embodies all available and vital data relating to the civic, commercial, financial and industrial interest and activities of the municipality, and is complete in all its parts.

The publication has had the benefit and advantage of the complete organization of the publishers, of the skill and experience of their corps of compilers, and, added to this, the courteous co-operation of the citizens.

All the features embodied in previous editions are repeated in this volume with additions and improvements as suggested by experience, thus adding to the value and usefulness of this Directory.

The statistical review following this introduction, prepared by the Chamber of Commerce, clearly visualizes the many and varied advantages and characteristics of the city.

The several essential departments are arranged in the following order:

THE BUYERS' GUIDE, pages 21 to 104, printed on tinted paper, includes numerous advertisements of the leading manufacturing, business and professional interests of Greensboro. These have been carefully grouped by departments and are indexed under classified headings and otherwise in various parts of the Directory. This is not display advertising, primarily, however, but rather is it reference advertising at its best. A casual perusal of these advertisements will picture many interesting phases of the city's activities. In a progressive manufacturing city like Greensboro the need for this kind of information readily at hand is very great, and the general appreciation of this need is evidenced by the liberal patronage the City Directory enjoys in many and varied fields of activity.

THE ALPHABETICAL LIST OF NAMES of citizens, business concerns and corporations in Greensboro is included in pages 105 to 604.

THE STREETS AND AVENUE GUIDE AND DIRECTORY OF HOUSEHOLDERS covers pages 605 to 746. In this section the names of the streets and avenues of Greensboro are arranged in alphabetical order, the residences and business houses are arranged numerically under the name of each street and avenue, and the names of householders and business concerns are placed opposite the numbers.

THE CLASSIFIED BUSINESS DIRECTORY, pages 749 to 803. This department lists the various manufacturing, mercantile and professional interests in Greensboro and adjoining boroughs, in alphabetical order by headings appropriate to the interests represented. This feature constitutes an invaluable and indispensable epitome of the business interests of the community. "The Directory is the common intermediary between Buyer and Seller.,,

GREENSBORO

THE PIVOT OF THE PIEDMONT

Location, Climate, Population, Government, Commerce, Business, Industry,
Schools, Recreation, Civic Spirit and Agriculture

By Publicity Department
The Greensboro Chamber of Commerce

Airplane View of City

A Pleasant Land

"As pleasant a country as ever the sun shined on; temperate and full of all sorts of excellent viands; wild boar is as common as the tamest bacon, and venison as mutton.

"And you shall live freely there, without sergeants, or courtiers, or lawyers—you may be an alderman there and never be a scavenger; you may be an officer and never be a slave. You may come to preferment enough—to riches and fortune enough—and have never the more villany nor the less wit. Besides, there we shall have no more law than conscience, and not too much of either; serve God enough, eat and drink enough, and enough is as good as a feast."

In the English comedy "Eastward Ho" of 1605, the engaging picture above was given of the new country awaiting settlers across the Atlantic and, although the years have brought their modifications in human customs and wild life, those who know the temperate Carolina country realize that it is yet "as pleasant a country as ever the sun shined on."

Blessed by fortune with a pleasant year-round climate, freedom from destructive storm and flood, an abundance of natural resources in minerals, soils and forests, the people of the great piedmont area of North Carolina have contributed their labors in making it indeed a land of pleasant life and friendly custom, of progress in state and city government, of intelligent activity on farm, in store, in office and in factory.

Greensboro and the area surrounding it offer to the visitor all these advantages and a hundred others which must be experienced to be appreciated. There is work enough and play enough all the year to make for happiness and contentment.

Greensboro's history opened in 1808, when the county commissioners bought its

site from Ralph Gorrell for \$98 and on the 48-acre plot a new county seat was established for Guilford county, the court house in the center. Since the establishment of Guilford county from sections of Rowan and Orange counties a few years before the Revolution, the county seat had been located at Martinsville and it was this site which was made memorable in the battle of Guilford Court House in which the Continental troops and militia of General Nathanael Greene met the British regulars under Cornwallis and, although they were forced to retire from the field, left the redcoats so badly crippled they had to withdraw to Wilmington and this was but a preliminary to the march to Yorktown, the siege there and the surrender.

Greensboro's history was uneventful for long years, the bare county seat gradually gathering around itself a cluster of homes and stores, and from its hardy native stocks furnishing its share of leaders and of followers in the long hard struggle for the making of an independent state.

Governor John Motley Morehead, her leading citizen for years, was a chief figure in the legislative approval and the organ-

ization of the North Carolina railroad, which brought the first rail line to this city in 1856. The days of Civil War came on and Greensboro and Guilford sent their share of youth and valor to the field, many of these soldiers never returning. The slow, hard years of reconstruction passed and gradually there was recovery from the exhausted poverty which had stricken the land. Through the varying fortunes of financial depression and political disturbance, there was the upbuilding of a new reserve of power and the opening of the century found Greensboro ready for leadership in the industrial revolution in the piedmont area.

The Cones came to Greensboro and started the industry which has since grown to world leadership in denim manufacture and to a vast output of various cotton goods. Harper J. Elam had originated the expression "The Gate City" and people began to realize its truth, that in location and in

transportation facilities, Greensboro was the central meeting place of a splendid area of development. It was not perceived 25 years ago save by a few leaders and its full significance is not widely seen to-day, but the first quarter of the new century has brought proof enough of the astounding forces which are back of Greensboro's destiny and which will make its next 25 years of growth even more amazing than the last. The village has been transformed into a modern city of 50,000 persons, from comparative poverty her resources have grown until the deposits in her banks to-day exceed those of the entire state 25 years ago, her advance in every type of material prosperity has been equalled by her progress in civic consciousness and pride. Greensboro is awakening to her destiny of leadership in a magnificent industrial, commercial and agricultural region and the only difficulty in reading her future is to have the vision to encompass its greatness.

General Greene Statue

Location and Natural Advantages

Greensboro is in the center of Guilford county and the county is just north of the geographical center of North Carolina. The state is roughly divided into three sections, the wide coastal plains of the east and the mountainous country of the west between them the rolling piedmont country, about equal in area to the other two and enjoying an even more temperate climate than either.

It is this piedmont country which is the heart of the industrial region of the southeast. In 17 southern states, only Missouri and Texas exceeded North Carolina's total value of manufactured products in 1926, a total of \$1,050,434,000 and entailing southern leadership in cotton goods, tobacco products, furniture and other lines. During the current year more than \$200,000,000 has been paid into the federal coffers in internal revenue, chiefly on tobacco products. In 1926 her factory workers numbered 182,235 and were paid \$134,237,000.

The piedmont area is the very heart of North Carolina's factory region and it has over 75 per cent. of factories, workers and products the state shows. The piedmont also contributes its relative share to the agricultural products of the state. The value of North Carolina farm products in 1926 was \$327,680,000, greater than in any other southern state save the empire of Texas.

Just as the piedmont is at the heart of North Carolina, her industry and agriculture, so Greensboro is at the heart of the piedmont, the veritable "Pivot of the Piedmont." It is estimated that 600,000 people live within 50 miles of the city, that 75 manufacturing towns and cities are located

within that radius, that over \$200,000,000 worth of merchandise and goods is sold in that area annually. This concentration of population and activity is growing more marked every year. It is doubtful if another area of equal size in the south can show the strength of the 50-mile circle with Greensboro as its heart and embracing the industrial centers of Winston-Salem and High Point.

Chief among the city's natural advantages is a climate with a normal average temperature of 59 degrees Fahrenheit, an evenly distributed precipitation of 47 inches a year, a growing season of over 200 days and freedom from extreme heat or cold.

Greensboro's advantages of location are numerous. She is but 12 hours by fast train from New York and is, accordingly, within easy reach of the great marketing centers of the east. She is on the edge of the cotton belt and her dealers and manufacturers of the staple have their supplies at hand without any heavy transportation charges. She is in the midst of the network of power lines which the Duke interests have thrown across the state and has easy access to cheap electrical energy. She is in an area where the foreign born are less than 1 per cent. of the population and where there is a plentiful supply of native white labor, competent and intelligent, she is, finally, in a region of scenic beauty and is the gateway through which the tourist cars pass each season by the tens of thousands on the way north or south.

Progress in City Government

Greensboro has never had a scandal in her government. In 1921, however, the civic leaders rebelled against a conservative government which they considered staying too closely by the precedent and not taking heed of the demands of a new period in the city's growth. The city manager form of government was adopted, with a council composed of business and civic leaders. The same powers yet retain the conduct of the city's affairs, and the recital of the concrete achievements of the past six years reads like a fairy story.

Paved streets have been increased from 26 miles to 115 miles, water lines from 25 miles to 125 miles, a billion-gallon reservoir has been established and a modern pipe line built to connect it with the modernized pumping service and a rebuilt distribution system comprising over 8,000 meters, sewer lines have been increased from 38 miles to over 120 miles, the police department has been doubled in size to present force of 52 men, the fire department quadrupled in size to strength of 50 men, a modern central station and two new sub-stations built, fire alarm boxes increased

from 40 to 165, a modern alarm service installed and the department put on a full-paid basis. Advance in health work has been as notable with organization of a staff of 12 nurses retained the year round, the operation of a modern abattoir, the operation of a modern incinerator, the establishment and enforcement of rigid inspection of milk and dairy products and many other phases of health activity.

A recent achievement of the city council was agreement with the Southern Railroad for erection of 12 underpass or overpass structures at a cost of \$1,000,000 for elimination of the grade-crossing threat in Greensboro.

A work now being undertaken is the development of the vast area of parks which has been secured bisecting the city along the line of Buffalo creek. Along with this is planned the extension of the city library and the possible development of a community center. Mayor E. B. Jeffress is mayor of the city, while members of the council are R. R. King Jr., David White, E. R. Ford, Fred Taylor, Julius Cone and W. M. Ridenhour. P. C. Painter is the capable city manager.

Population and Area

The United States census of 1920 gave Greensboro a population of 19,861, but a special census count by the government agencies in 1926 gave the city a total of 48,500 persons. This gain was largely accounted for in the expansion in the city's area which was made in 1923 by special act of the legislature. There also entered into the new figure, however, an unprecedented increase in the number of people living in the metropolitan area of the city, an increase which to-day has resulted in the suburban areas becoming almost as densely settled as were the regions which were taken into the city in 1923.

As increased in size, Greensboro has an area of slightly over 17 square miles. Within this territory there is certainty that well over 50,000 people are living to-day.

Less than 25 per cent. of the city's population is negro and the negro citizens are far above the average in intelligence and in racial restraint. This is perhaps due to the fact that the people of the city have always played fair with the negroes in educational facilities and that, in addition to good common school advantages, Greensboro has three colleges of excellent reputation in training members of the race.

Southern Station
Just Completed at Cost of \$1,000,000

Commerce and Transportation

Greensboro's commercial development has depended on four factors, the enterprise of her citizens, the richness of her farming country, her central position in the section and the state and the excellence of her transportation facilities.

The Southern railroad is Greensboro's chief agent of transportation. The operating heads of that great system regards it as the central transfer and distribution point of the piedmont. It was in recognition of this that the road has completed its \$1,000,000 passenger terminal here and is now engaged in almost as large an expenditure on freight transfer and shipping facilities. Greensboro lies midway between Washington and Atlanta on the Southern's main double-track line. She is also about midway of the North Carolina line between Goldsboro and Asheville which the Southern holds under 99-year lease. In addition, she is a central point on the Atlantic and Yadkin railroad between Sanford and Mt. Airy.

A passenger service of 42 trains daily is had in and out of the city, while local and through freights thunder through the yards here daily in the number of 250 or more.

Through state and county construction, ten modern hard-surfaced roads and that many more improved soil roads radiate

from the city in every direction, with the city at the crossing point of three of the state's most important highways, routes 10, 60 and 70. Taking advantage of this, a fast passenger bus service has been so far advanced that nearly 100 busses leave the city on regular schedule each day. The excellence of the city's transportation facilities may be judged from the fact that it is the section's leading home for traveling men, nearly 2,000 of them having their headquarters in this city most of them owning homes, but many using the city's hotels as their central residences.

Greensboro's advance as a wholesale and jobbing center has been more rapid since the recent decision of the Interstate Commerce Commission on the Southeastern rate case and to-day she is holding a dominant place in hardware, groceries, tires and rubber goods, produce, cotton goods and the like. The rates are favorable, excellent facilities may be had adjacent to the railroads, the freight and express service is prompt, while the central position of the city in mail distribution is a great advantage for business of the kind.

The modern road system is the city's greatest advantage in retail trade, although a number of the merchant houses have built up reputations that would pull the

trade to Greensboro regardless of the roads. In the city's immediate retail area there are around 300,000 people.

A modern curb market has been lately established and is functioning smoothly with cordial relationship between the city and country people.

A chief commercial advance of the year has been the establishment of the air mail line between New York and Atlanta with one of the five main stops located 8 miles from Greensboro at Friendship. This new and fast service is expected to add another strong appeal to the city's bid for consider-

ation as a headquarters for business operations.

The Greensboro Chamber of Commerce was the chief agency working in behalf of the city for the establishment of the air port. This organization of 1,000 members is active in every phase of municipal and civic advance. The Greensboro Merchants' Association, comprising nearly every commercial concern in the city, is also a very active organization. James A. Gawthrop is secretary of the Chamber of Commerce, while Fred C. Phipps is secretary of the merchants' organization.

Business Leaders

Jobbing, wholesale and retail trade are leaders in the city's business structure and take a prominent part in the more than \$315,000,000 activity revealed in the clearings of the banks in 1926.

Another leading factor in the city's business life is the insurance organization, with 12 home companies doing a business last year exceeding \$12,000,000 in income and with over \$500,000,000 insurance in force. The leading company, the Jefferson Standard Life Insurance company, is in its 17-

story office structure. The Dixie Fire Insurance company owns its six-story building, while the Pilot company recently announced the plan of its new home at Sedgefield, a mile or two from the city limits.

The three banks of the city report a combined capital and surplus exceeding \$4,000,000, combined resources over \$21,500,000 and clearings last year of over \$315,000,000, nearly 20 per cent. gain over the previous year. There are three industrial banks catering to installment loan and

The Piedmont Office Building

JEFFERSON STANDARD BUILDING

saving business. Building and loan associations show assets over \$4,500,000.

The building trades necessarily occupy a big place in the community's commercial structure in light of the fact that 10 years past have brought around \$35,000,000 in building to this city. Last year 1,111 permits were issued for \$6,362,000 in building, and the permits for the first four months of 1927 indicate as large or an even larger figure for the present year.

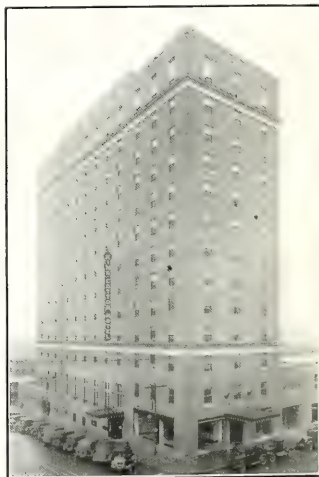

In light of the city's position as a jobbing and wholesale center and as a tourist con-

centration point on a number of routes, Greensboro's hotels have assumed an important place in the business of the city. There are eight hotels of good standard and several others which do not rate so high. The leaders are the O. Henry with 325 rooms and the King Cotton with 225, both are as modern homes for the traveling public as the country affords.

Greensboro as a home of cotton merchants and brokers handles approximately 400,000 bales per year, a business of around \$50,000,000.

O. Henry Hotel

King Cotton Hotel

Greensboro in Industry

With 150 industries producing around 100 different products, the city affords industrial employment for 15,000 people approximately. The annual payroll is close to \$15,000,000.

The chief industry is that of the Cones', whose mill at White Oak produces more than 200,000 yards of denim daily for world leadership from a single mill and whose plants at Revolution and Proximity, all three within the city limits, give the concern a size exceeded by but few in the nation in the cotton goods manufacturing industry. The Pomona mills are also important in the cotton manufacturing trade.

A tremendous impetus to the silk manufacturing business in Greensboro has been given within the last six months in the addition of two modern plants to the city's industrial roll, both established by Philadelphia concerns and both erecting modern plants in the west part of the city. An investment of well over \$500,000 is being made in Greensboro by the firms.

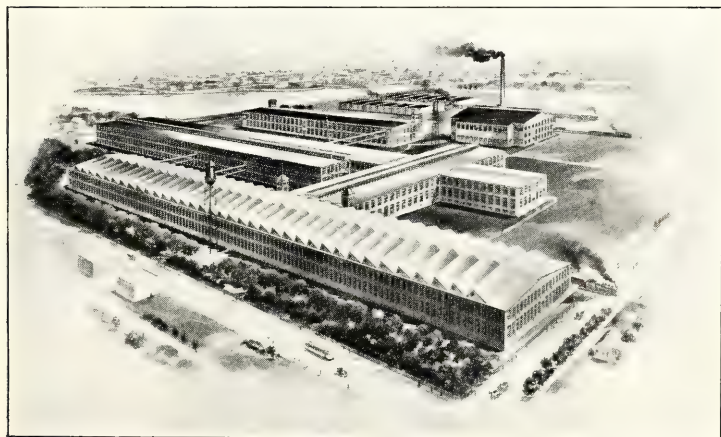

The Vick Chemical company, with its chief laboratory factory, office and executive departments in Greensboro, is one of the most important elements in the city's business structure. Over 21,000,000 jars of the product, designed to combat colds and coughs, were sold last year.

The Blue Bell Overall company, owned by the Big Ben Company, is doubling the size of the Greensboro factory to make it one of the largest in the world. The concern uses 150,000 yards or more of denim each day in the manufacture of its products.

Greensboro has a number of cigar factories doing good business.

An important section of the industrial activity of the city is held by the fertilizer factories, plants being operated south of the city by several of the big national concerns.

Recent years have seen an increasing activity in steel and iron fabrication and in kindred industries.

White Oak Mills
World's Leader in Denims

School Facilities

Good schools are any city's greatest inducement for new settlers, and in this division Greensboro excels. There are 8,500 pupils in the schools of the Greater Greensboro district and, although present facilities are as good as the average, the city is not content and the people have already authorized the expenditure of \$2,300,000 in erecting additional structures and securing more and more modern equipment. The standard of teaching is high, as is evidenced by the fact that year after year Greensboro ranks first in the state in quality of her public school work on estimate of the state authorities.

The city has two colleges for whites and three for negroes, with three other colleges for whites within 15 miles of her limits. The two white colleges are for women, one of them North Carolina College for Women with nearly 2,000 students and a magnificent physical equipment. The other is Greensboro College, a Methodist institution of honorable history and of high standing.

The leading negro college is the State Agricultural and Technical College, for males. There are two negro colleges for women.

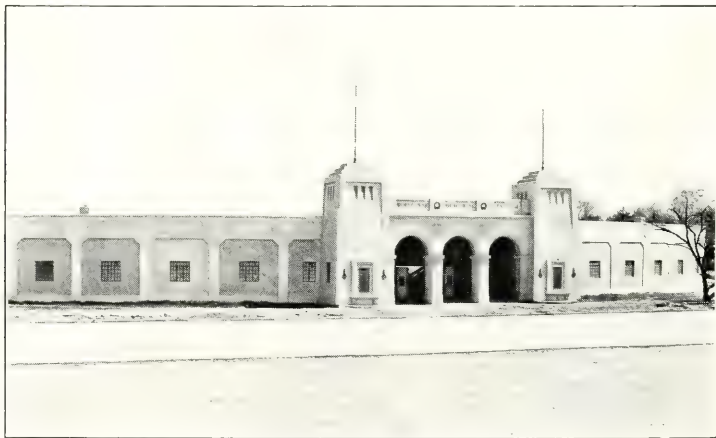

Recreation in Greensboro

The chief recreational facility of the city is in her system of public parks, bisecting its area and providing an acre of park lands for every 50 persons. These lands are rapidly being improved and fitted for public use. A system of public playgrounds is needed and that need is to receive the attention of the city authorities at an early date.

Two 18-hole golf courses are available and another is soon to be constructed. These are at the Greensboro County Club and at Sedgefield. In addition to these places a dozen or more club grounds and buildings are maintained near the city, with facilities

for polo, horseback riding, swimming, tennis, baseball and other sports. The resort at Sedgefield, five miles south of the city, is centered about a splendid new hotel. The region is being made into one rivaling Pinehurst and Southern Pines in beauty and excelling them in the respect that the climate permits an all-year-round appeal.

The competition of the \$150,000 World-War Memorial Stadium has provided a center for the leading sport events of city, county and state and its advantages are being used enthusiastically.

World-War Memorial Stadium

Type of Modern Dairy Barn

The Country Regions

The rapid growth in Greensboro's population and wealth has been a great aid to the rural back country, for in the provision of a market the dairymen, truckers and farmers have found their chief opportunity. Using modern production methods, they have gone ahead rapidly and, where 10 years ago Guilford county was not much above the average North Carolina county in country wealth, to-day she is a leader.

Pure-bred sires have been introduced by the forward-looking dairymen and the production of milk and dairy products has been so far advanced that for the first time in her history Guilford county is now shipping condensed milk outside of her boundaries. The butter, cream, milk and other dairy

products sold in the city are rigidly inspected by city authorities. It is due to this and to the purity of the water supply and excellence of the sewage disposal system that only a few cases of typhoid fever have been known in years.

Guilford county is on the edge of both the cotton and the tobacco raising belts and her farmers plant both but not in great measure. There is a balance of crops and more attention is paid to the dairying, trucking, grain side of farming than is paid in sections where the money crop is all the rage. The county government maintains a farm expert and home economics expert and they are paid attention.

Typical Dairy Herd

Greensboro's Civic Progress

While much of Greensboro's advance in recent years has been the inevitable result of natural advantages, a big part has been played by the initiative and the energy of her residents. There is an air about the city not usually found in a southern one. There is a western breeziness, a yankee verve, a modern attitude along with the traditional southern friendliness. Her people believe in making good livings, in spending freely, in having much, in giving much and in going forward together.

This attitude has found expression in numerous organizations for promotion of

business, civic and social progress. Besides the regular business men's clubs, others have sprung into existence in which men of various trades or interest have associated themselves for mutual aid. In advancing civic consciousness and activity such organizations as the Civic Music Association, the Open Forum, the Euterpe Club and others of the kind have taken active roles in recent years. An expression of it was in the subscription of \$150,000 last year for erection of a Memorial Stadium now complete and seating 10,000 persons. Greensboro has 55 churches, a new Y. M. C. A., a new Y. W. C. A., four hospitals and its part of all the other organizations which go so far toward making up a modern community.

HARDWARE

JUDGE SERVEL ELECTRIC REFRIGERATION ON THESE 4 POINTS

1. **Beauty.** Exterior finish in lustrous white Duco enamel on lead coated steel. Top beading. Rounded corners. In all, a decided advance in refrigerator design.

2. **Performance.** Double compressor. Double fan. Coldest refrigerant in domestic use. Positive pressure control. Cold storage reservoir. SERVEL "Duplex" system assures smooth, quiet operation with abundant reserve capacity.

3. **Serviceability.** Cabinets of heavy pressed steel (lead coated) inside and outside. Food compartments lined with solid one-piece porcelain fused on welded steel. Thick corkboard insulation. No corrosive substance in the system to shorten its life. SERVEL "Duplex" has been aptly called the 20-year electric refrigerator.

4. **Money-back guarantee.** If, within a reasonable time after installation of your SERVEL "Duplex", you are not fully satisfied, we will take it back and refund your money. Every part bears our one-year guarantee.

OFFICE BUILDINGS

THE GREENSBORO BANK & TRUST BUILDING

Some of the Outstanding Features of the Building:

Location—

Center of the city's business district.

Construction—

Absolutely fireproof.

Exposure—

Every office an outside one, affording abundant light and ventilation.

Elevators—

Uninterrupted elevator service day and night. All day freight service.

The comfort and convenience of our tenants is paramount

Running water in every office.

Ice water fountains and rest rooms on every floor.

Garage—

Sixty car capacity operated in conjunction with building.

Law Library—

Completely furnished and equipped for the use and convenience of attorneys.

Janitor Service

Unsurpassed.

REAL ESTATE

Real Estate Is the Basis of All Wealth

AND

Correct appraising of real estate is responsible for the stability of Financial, Manufacturing and Mercantile Institutions.

Buyers of real estate and investors in securities are vitally interested in the underlying principles of values.

Our scientific methods of Appraisals determine the underlying principles which make values, and replace the haphazard system of guessing at valuations.

Greensboro Real Estate Board

"BUILDERS OF GREENSBORO"

An organization of real estate dealers and agents, holding membership in the National Association of Real Estate Boards. By its high ethical standards it elevates the profession of real estate dealers. It disciplines its own members for any lapse from its high standards and is instrumental in securing the prosecution and conviction of persons guilty of real estate fraud. It guards all proposed legislation relating to real estate. It conducts a real estate school where good practices are instilled into the minds of its members.

It gives to its members the right to use the title "Realtor," which carries with it the same guarantee to the purchaser of real estate that the word Sterling does to the purchaser of silverware.

The Code of Ethics under which it operates is as stringent as that under which any business or professional organization in the land operates.

Commissions.—It has established and maintains an equitable rate of commissions on the sale and leasing of real estate acceptable to both real estate owner and broker, protecting the owner of property from excessive charges of unreliable agents.

Valuation.—Its Appraisal Committee is recognized as the highest authority on realty values for use in buying and selling

property, tax accounting, closing estates, determining values of leaseholds, corporation asset insurance, and income tax purposes.

In Conclusion.—An active member of the Greensboro Real Estate Board is a realtor who keeps tab on the pulse of the city. He is ever aggressive in the promotion of enterprises which will enhance the industrial, commercial, residential and social values possessed by the city. He is informed as to real estate values and is a city builder and a man of conscience and patriotic purpose.

The officers and Executive Committee of the Greensboro Real Estate Board for the year 1927 are as follows: W. E. Blair, President; E. E. White, Vice-President; David J. White, Secretary-Treasurer; E. S. Wills, W. C. Ogburn, Kemp C. Clendenin and E. A. Ranson.

For full list of all members see reverse side of this sheet.

Hill Directory Co.'s (INCORPORATED) Street and Household-ers' Directory OF GREENSBORO, N. C. --- 1927

Copyright, 1927, by Hill Directory Co., Inc.

In this section the streets are arranged in alphabetical order, the numerically named streets follow immediately the named streets in numerical order, without regard to geographical location, the intersecting streets being shown at proper intersection. The number of each building on the street is given in numerical order, and opposite the number the name of the occupant householder. In the business blocks containing offices and stores the occupants of each place are shown. In some of the outlying districts the street numbers are incorrect, the houses not numbered, or are so scattered that it was not thought advisable to include in the Household-ers' Directory such streets in this issue. The name of every inhabited street, however, is given with full description.

The list includes all alleys, avenues, courts, places, circles, squares, terraces and sub-divisions, giving their location as near and concise as possible.

The profession, business, etc., of individuals and firms will be found in the Alphabetical section of this directory.

Every effort has been made to insure accuracy in this issue. If your house does not appear upon its proper street, or if the street upon which you reside does not appear, we will thank you to notify us so that correction will be assured in the next issue.

NOTE.—Dash (—) before name denotes that the house should have a number between the one preceding and the one following it. (* * *) between two intersecting streets show there are no houses between them.

City Directory

Don'ts

DON'T put your Directory in an out-of-the-way place, but keep it where your customers can see and use it without stopping someone to find it.

DON'T think that a Directory is paying for itself unless you use it, any more than an idle clerk can make you money.

DON'T look mad when a customer asks to look at your Directory.

DON'T look happy when a neighbor wants to borrow your Directory, for if you do, he will borrow it again, and if all were borrowers, when would the next Directory be published?

DON'T forget that an up-to-date city must have a Directory; and a merchant that has no Directory is what?

DON'T forget that a Directory borrower today will forget to return it tomorrow and you will call him what?

DON'T forget that the man who has a Directory pays for it and the borrower gets for nothing what another man pays for. What do you call him?

Hill Directory Co.'s

**The EYE is seventeen times
stronger than the EAR.**

**Research has proven that
impressions received through
the eye are seventeen times
more effective than those re-
ceived through the ear.**

Your advertisement in the City Directory reaches the
vision of your prospects all over the city 365 days in the year,
because some one is using it every hour in the day.

HILL DIRECTORY CO., Inc.

PUBLISHERS

P. O. Box 879

RICHMOND, VA.

This Publication Is The Product of A Member of

Thus assuring you the ultimate service that skill and care can produce in the way of City Directories or other reference media.

The following "Standards of Practice," adopted at the inception of the Association of North American Directory Publishers in 1898, and strictly adhered to over the years, is your guarantee of satisfactory Directory Service.

The publisher of a Directory should dedicate his best efforts to the cause of business uplift and social service, and to this end pledges himself:

1. To consider, first, the interest of the user of the book.

2. To subscribe to and work for truth, honesty and accuracy in all departments.

3. To avoid confusing duplication of listings, endeavoring to classify every concern under the one heading that best describes it, and to treat additional listings as advertising, to be charged for at regular rates.

4. To increase public knowledge of what Directories contain; to study public needs and make Directories to supply them; to revise and standardize methods and classifications, so that what is wanted may be most easily found, and the Directory be made to serve its fullest use as a business and

social reference book and director of buyer and seller.

5. To decline any advertisement which has a tendency to mislead or which does not conform to business integrity.

6. To solicit subscriptions and advertising solely upon the merits of the publications.

7. To avoid misrepresentation by statement or inference regarding circulation, placing the test of reference publicity upon its accessibility to seekers, rather than on the number of copies sold.

8. To co-operate with approved organizations and individuals engaged in creative advertising work.

9. To avoid unfair competition.

10. To determine what is the highest and largest function of Directories in public service, and then to strive in every legitimate way to promote that function.
